<sup>3</sup>Australian Bird and Bat Banding Scheme, P.O. Box 8, Canberra City, ACT 2601

<sup>4</sup>Deal Island Lightstation, P.O. Box 75, Foster, Victoria 3960

*Received 21 March 1989*

Observations and banding of land birds were undertaken at Deal Island and Wilson's Promontory lightstations in north-east Bass Strait between February and May 1988. Data on the timing and route of migration of several species are presented, as well as evidence for pre-migratory fattening in Flame Robins and Grey Fantails. The movement of several species not previously thought to cross Bass Strait is also documented.
